CAREER OBJECTIVE

Motivated Computer Science and Data Science student with knowledge in Python, C, C++, and Frontend Web

Development seeking offline internship opportunities to enhance technical and problem-solving skills through real-world projects and practical experience

Education

B.E Computer Science - Data Science

- Annamalai university , Cuddalore | 2024 - 2028 | Current CGPA : **8.819**

HSC

- St.Marys' Girls Hr. Sec. School, Mettur with **87.5%**

Technical Skills

- HTML | CSS | JS
- Python
- C and C++

Projects

CPU Scheduling Simulator – Web-Based OS Project

- Developed an interactive CPU Scheduling Simulator using HTML, CSS, and JavaScript to visualize and analyze different CPU scheduling algorithms such as FCFS, SJF, Priority Scheduling, and Round Robin. The project calculates waiting time, turnaround time, and execution order dynamically based on user input, helping users understand operating system process scheduling concepts through a simple and responsive web interface

Project Link : [CPU Scheduling Simulator](#)

Weather Web Application

- Developed a responsive weather forecasting web application using HTML, CSS, and JavaScript with real-time Weather API integration to display temperature, humidity, wind speed, and weather conditions for different cities. Designed an interactive and user-friendly interface with dynamic updates, improved skills in API handling and DOM manipulation, and deployed the project using GitHub Pages for easy online access.
